If you are not part of the solution, you are part of the problem. I am running to represent the Democrats in my community on a state-wide level. I've been an activist and Leader with the Chesco Dems since 2004 and it's time to step up to the next level. The PADSC determines the platform for PA Dems and passes important resolutions. For example, at the most recent meeting in February, we passed a new sexual harassment and misconduct policy that outlines a standard policy and response governing all state, county-level and local party events (I was present with a proxy).

There is a **BIG BLUE WAVE** coming! This is a time in our state and our country when we can really effect change and I'm excited to be a part of that historical change.

I am a passionate, true blue Democrat. I consider myself a progressive, but I am also pragmatic. I know when it is necessary to compromise to accomplish goals, and also when it is necessary to draw a line in the sand and stand firm on principles. We need to remind ourselves that all Democrats have shared values and that when we pull together, we can accomplish great things.

Issues that I would concentrate on are:

- 1) Craft and promote a clear, concise, consistent message to voters
- 2) Guarantee a woman's right to choose
- 3) Encourage movement toward sustainable forms of energy to protect our environment
